NEW BONANZA IN TINTIC CAMP

Rich Ore Bodies in Two Places at Richmond & Anaconda.

UTAH COPPER'S NEW MILL

MAMMOTH PLANT'S LOCATION IS STILL UNDECIDED.

Strikes have been made at two points in the Richmond & Anaconda com pany's property at Tintic during the past few days which, if appearance count for anything, is going to make of that property a bonanza of more than ordinary importance. On his arrival from Tintic yesterday morning, Manager John Dern, of the Uncle Sam. exhibited samples of ore from the new finds which bore the earmarks of being exceedingly rich. One came from a winze to the east of the tunnel level. and the other from a distance westerly and on the tunnel level.

The samples from the winze were rich in silver bromides, chlorides and some galena and, according to the charactercates that he will not, at least, retire in stics of that ore in the Tintic camp, it should run well up in gold as well. A fine face of the ore had been developed when Mr. Dern was at the mine Friday and he said it would not be long till there was a shipment on the market. The ore is said to be identical which is saddled upon him should be taken off.

"No one would like to see Captain which is said to see Captain." the market. The ore is said to be identical in appearance with the richest rock which comes from the Victoria and Grand Central mines and R. Miller and Frank Anderson, who made the discovery since taking a lease March 1, and who are well posted in the district, firmly believe they have the same greater than usually falls to the lot of the same greater than usually falls to the lot of the same greater than usually falls to the lot of the same greater than usually falls to the lot of the same greater than usually falls to the lot of the same greater than usually falls to the lot of the same greater than usually falls to the lot of the same greater than usually falls to the lot of the same greater than usually falls to the lot of the same greater than usually falls to the lot of the same greater than usually falls to the lot of the same greater than usually falls to the lot of the same greater than usually falls to the same greater than usuall

not be disposed to cut the lessees off at the pockets on such short notice. He feels that their discoveries, if they turn out well, entitles them to a show for their white alley, so to speak. How-ever, with the kind of ore shown yesterday, Messrs, Anderson and Miller could clean up a fortune in four months if it showed up in quantity.

UTAH COPPER TO EXPAND.

New Mammoth Milling Plant Sure, But Location Undecided.

Following the investigations which have been made and the discussion of the various problems involved in the Jackling, of the Utah Copper company state last evening that the announcement might be made that his company would erect another mammoth mill—a plant with a capacity of probably three times that of the great such a character as to place everything will never in operation at Ringham. mill now in operation at Bingham—but its location had not been definitely determined, nor could it be for possibly several days yet.

"You can say," said Mr. Jackling, "that the mill will be built either in

Everything will depend on negotiations now pending with relation to the trans portation problem. If the plant is to go Everything will depend on negotiations now pending with relation to the trans portation problem. If the plant is to go up on the shores of the lake, a branch road from the line of the San Pedro will be a necessity. This is the feature gone through the patenting process of the business now being considered without protest. The gravel runs from of the business now being considered and its determination will decide the location of the mill.

Other than that Manager Jackling said there was nothing that could be said at this time. It is about the best piece of news that has been officially released in mining circles for a long time just the same, for it means that by the time another season opens, at the farthest, the Utah Copper company will be mining at the rate of not less than 3,000 tons of ore per day. It means the employment of hundreds of men and the distribution of a great men and the distribution of a great deal of money in this valley during the next twelve months. In addition to that it means that within another year or so the aggressive band of operators which comprises the Utah Copper company, will be marketing concentrates and piling up money at the rate of something like \$5,000 per day and that dividends of at least \$100,000 per month will be earned. The company has already shown what the property can do not the optimates here given are and the estimates here given are no extravagant, by any means.

HAVE NEVADA BONANZAS.

Local Talent to Tackle Goldfield and Tule Canyon.

George E. Blair and others, of this city, have just become interested, with Frank H. Lathrap, who is now per-manently located at Goldfield, in a couple of propositions which are counted upon to make all kinds of money for them in the near future. Two companies have been organized under the laws of Arizona, which are headed by W. H. Wells, a big Philadelphia operator, and which also include strong Cal-

laws of Arizona, which are headed by W. H. Wells, a big Philadelphia operator, and which also include strong California and Nevada talent. One is formed for the purpose of operating a group of claims south of Goldfield and the other to work a big placer proposition in Tule canyon.

The Red Dog Mining company, which has the group of claims south of Goldfield a few miles, has stripped one of the ledges in the ground for some distance. Five assays, made from rock taken at different points, gave returns of \$32, \$60, \$64, \$820.80 and \$2,334, respectively. Work has already commenced in earnest on this ground, and the management is sanguine of developing a shipping proposition within a very short time. From a claim adjoining, Mr. Blair says, \$400 ore is now being regularly sacked for shipment. The officers of this company are: W. H. Wells, president: W. H. Webber, vice president; Frank H. Lathrap, secretary

and treasurer; George Curley and George E. Blair.

The Esmeralda Placer company will operate the Tule canyon placer ground, which consists of 100 acres. The same men are at the head of it, with one exception. The company also owns a townsite and two large springs in the canyon. This ground was worked by Mexicans in early days, but they hardly scratched it. Red rock according to the prospecting done, is shown to be from twenty to thirty feet below the surface. For six feet above bedrock the gravel runs from \$6\$ to \$7 per cubic yard, and on the bedrock there is a large flow of water which the company intends to utilize in sluicing. It is the intention to at once run a tunnel in to bedrock, harness the water and begin washing the gravel just as soon as water sufficient has been secured.

shafts of shallow depth for the purpose of proving up the vein. This extensive outcropping ought to be at, indication is confirmed by the underground workings now existing. These workings consist of a shaft sunk to a depth of 300 feet and connected with the 100-foot level by a tunnel from the shaft and running in a southerly direction 700 feet, from which a large amount of ore already has been mined and shipped. I consider this mine the most valuable of your properties."

MINING STOCK EXCHANGE.

Week Has Been One of Fair Trading and Strong Prices.

MACVICHIE WILL STAY.

Bingham Con, Manager Denies Report That He Will Leave Co.

General Manager Duncan MacVichie of the Bingham Consolidated, who has reached the Boston offices of the company, wires a denial of the rumor that he may soon sever his connection with that company, as reported here earlier in the week. Since the report was given publicity any number of mining men here have expressed the hope that the captain would stay with the proposition, and word from him, though no couched in the strongest terms, indi-cates that he will not, at least, retire in June. The opinion among men who recognize the tremendous amount of

trict, firmly believe they have the same stream usually fails to the fissure which has proven so rich in the of mine managers. He started out with mines mentioned.

The strike, which they have made —the Commercial. Then a smelter was mines mentioned.

The strike, which they have made in the drift west from the tunnel, came as a result of careful sampling along the sides and a decision to start a crosscut where a nice little streak gave promise of developing something. A short distance carried the face into a breast of ore which is evidently very rich in copper and associated with which it is expected good silver and gold values will be found.

Mr. Dern was not prepared to give assay values of either character of rock and, while they would no doubt have made interesting reading, the rock is rich enough for the merest novice to see what it is. If the strikes pan out as they give promise of doing, new life the handling of custom business, the srick enough for the merest novice to see what it is. If the strikes pan out as they give promise of doing, new life will be injected into that particular portion of the camp as some of the neighbors which have yet to make a showing, will be in line for big things. Among them might be mentioned the Plutus on one side and the Bullion-Beck Tunnel company's La Reine on the other.

The strike also means everything to the Uncle Sam company, as 400,000 of the 500,000 shares of stock in the Richmond & Anaconda belongs to that corporation. The lease on the property was given for four months from March 1, but Manager Dern says that if the strikes amount to anything he would not be disposed to cut the lessees off

Company Expects to Clean Up \$25, 000 This Season.

The directors of the White Rock Placer company will meet in this city tomorrow to ratify a deal which involves the sale of all of the company's treasury stock. A good price has been offered for the stock and the money is to be applied, in part, to building a large tailings dam across the canyon in which the mines are located, for the purpose of preventing the debris from purpose of preventing the debris from being washed down on to the lands of settlers below. This work is to commence immediately and W. D. Higgin-botham, manager of the properties, writes that he will be ready to begin the various problems involved in the washing gravel very soon, as the dam undertaking, General Manager D. C. can be constructed while mining is in

in ship shape for heavy sluicing opera tions this season. Manager Higgin-botham assures us that he can clean up for the season all of \$25,000 and "You can say," said Mr. Jackling,
"that the mill will be built either in
Bingham canyon or out near the point
of the mountain in the direction of the
old lake bathing resort of Garfield.
Everything will depend on negotiations
Everything will depend on negotiations
Everything with relation to the trans-

50 cents to \$4 per yard in coarse gold and, in addition, there are outcroppings which indicate fine values in the lodes

ing at Battle Mountain.

L. A. Jeffs returned from a two weeks' trip to Battle Mountain, Lander county, Nevada, yesterday morning. Mr. Jeffs had previously secure a bond on a most promising copper property and he went out this time to put men at work and begin the devel opment of the ground. He stated yes terday that the formation and the owing near the surface were such a to give promise of opening up some-thing really big. At any rate, he has decided to work the ground and, if it turns out as he expects, the option upon

turns out as he expects, the option upon it will be exercised.

"The property is located only six miles off the line of the Southern Pacific railroad," said Mr. Jeffs. "There is considerable timber and plenty of water for all practical purposes, and that is something worth considering in a country like Nevada, where deserts are numerous and water a luxury." are numerous and water a luxury."

OPINION OF MAJESTIC MINES.

Samuel Newhouse's Report Deals Fa-

vorably With Two Properties. In his recent report to the director In his recent report to the directors of the Majestic company Samuel Newhouse, under whose management the mines of the company are being brought to the front, showed that he considered the Old Hickory and Harrington-Hickory properties particularly worthy of consideration. Of the latter

e says:
"I consider the Harrington-Hickory mine a promising one, amply justifying the expenditure of money to disclose fully its value and place it among the shipping mines." Boston market, with range and closing quotations:

Boston, March 25.—The market today developed unexpected strength and activity, all through the list. The trading in Copper Range was on a large scale. A. C. Burrage, one of the large holders of old Tri-Mountain stock, was reported to have been taken seriously ill last night, and this caused some selling of the stock, but his condition this morning was reported as very much better, and all stock thrown over was quickly taken at ad-Concerning the Old Hickory mine, he

says:
"The surface of this property shows an extensive mineralization. The apex of the vein is clearly discernable for a distance of more than 1,000 feet up the mountain side. The rein has been opened in many places by numerous

and Strong Prices.

During the week on 'change a total of 59,344 shares of stock, the selling value of which was \$38,955.16, changed hands, resterday's single regular and open board alls resulting in the sale of 27,509 shares or \$6,025.55

dls resulting in the sale of 27,509 shares in \$6.032.75. Compared with the week previous the cord shows an increase in the number f shares approximating 7,000, though the loney involved was over \$8,000 less. This due to the smaller amount of business in high-priced stocks. The close of the week finds nearly all f the more active traders commanding etter prices than at the opening, and in number of instances share advances ave been scored. Weak spots were so we have attracted no attention worthy f mention, while everything appears remonitory of a strong market for the ceek to come.

of mention, while everything appears premonitory of a strong market for the week to come.

The following brief comparison, with the ruling selling prices of Monday, will give a fair idea of the trend of the market in the more active traders:

Butler-Liberal has been steady around ide, and Carisa is le higher, at 13c. Daly. Daly-Judge and Daly-West have been handled only sparingly, and the prices in them are hardly up to what they were at the beginning of the week. Mammoth is also off about 5c, while Victoria and Grand Central are quoted a little higher, with next to nothing doing.

May Dav and Silver Shield have been the life of the market. The former opened the week at and around ide, and has since passed the 19c mark, with final sales at 19c and 18%c.

From 41c Silver Shield was hammered down to 38½c on Monday. By Wednesday it had touched 33c, but the stock would not come out, and a nealthy recovery set in. It touched 42%c, and closed yesterday at 41%c.

Uncle Sam and Yankee have also made good gains. Uncle Sam was selling at 36c and the close finds it at 41½c bid, 48c asked, and no sales. Yankee has moved up steadily from 39c to 43½c. New York Bonanza has done well also. Monday it went at 48%c, and from that it has climbed up to 51c and closes at 50%c bid, 52c asked.

Following is the list of final quotations and search was also made;

LEAMINGTON PROPERTY DEAL.

Overson Lead Mines Taken Hold of

by Salt Lake and Eastern Talent. Eureka, March 24.—James Overson has reached here with some fine samples of galena and lead carbonate ore from the Yellowstone mine, in the Leamington mining district. The property consists of three claims, situated four miles southeast of Leamington station, and are owned by Charles Overson and his two sons, James and Joseph.

George Smith of Salt Lake and George Ross of Marysvale have secured a bond and lease on the property for eighteen months for \$25,000. These men are backed by a party of Pittsburg capitalists and they will start April 1 to work the property. They are putting up a boarding house and a shaft house and in a very few days a Buffalo whim will be installed.

Already a shaft to the depth of 200 feet.

few days a Buffalo whim will be installed.

Already a shaft to the depth of 200 feet has been sunk and drift run about thirty feet on the 100-foot level. At the end of this drift there is a raise in which there are about six feet of ore running 60 per cent lead. In the same drift nearer the shaft a body of 40 per cent lead ore about ten feet thick has been struck. There are now upon the dump two carloads of first-class ore, and the parties taking hold of the proposition will be able to ship from the start.

The Oversons are going to leave for their claims four miles further north, in Wood canyon, where James Overson says they have ore from the grass roots. They have already taken out some high grade sliver ore. The vein crops on the surface, is about seventy-five feet wide and can be traced for about 600 yards.

Metal Markets.

Silver, 55% cents per ounce. Copper (casting), 14% cents per pound. Lead, in orc, \$2.50; New York, \$4.45 pe 0 pounds.

At the new camp of Kawich meals are 5 cents up, cots \$1.50 a night, water \$6 a Lake City.

ignate ONE ASSAYER.

barrel, and cedar wood \$20 a cord. The health of the camp is good. At a recent meeting of the miners wages were fixed at \$4.50 for eight hours. It was 'decided that no Japanese or Chinamen be allowed in Kawich.

In Kawich.

New York Commercial: The old Tiewaukee Mining company of Bingham.
Utah, and New York, is now regularly
dealt in on the curb. The company has
recently been organized to take over the
Tiewaukee mine at Bingham, one of the
pioneer properties of that district. The
mine has been a large producer and the
present management expects to lease a
portion of the property and develop the
balance itself.

After making a test run of several tons

balance itself.

After making a test run of several tons of ore at the new milling plant. Manager Henry M. Crowther of the Continental-Alta, returned from camp Friday night. Owing to the long distance of the aerial tram it has been found necessary to equip the line with more buckets in order to make it operate smoothly. These are to be added at once and then everything will be ready for the placing of the mill in regular commission. As the result of the tests made Friday it was shown that the mill will do its work splendidly.

Manager Tony Jacobson has returned

the mill will do its work splendidly.

Manager Tony Jacobson has returned from a several days' visit to the Columbus Consolidated, where he reports everything running like clockwork. During the two days he was at the mill the plant turned out fifty tons of high-grade concentrates, and he expects to see it doing that well regularly throughout the season. Teams have begun hauling down the canyon and the bins will be relieved of the great strain to which they have been subjected as specidly as possible. There are now between 500 and 600 tons of concentrates at the works awaiting shipment.
